DETAILED ACTION

Upon further review the following action is deemed merited. The examiner regrets the delayed prosecution of the claims.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21 - 30, drawn to a method for renting and charging a storage system, classified in class 705, subclass 26.
 - II. Claims 31 - 38, drawn to a system having a storage system that is owned by an owner and rented to a user, classified in class 235, subclass 383.
 - III. Claims 39 - 43, drawn to a method for renting and charging a storage system, which has a channel control unit, classified in class 705, subclass 29.
2. Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case, Group II has separate utility such as determining a contract.
3. Inventions Group I and Group III are directed to related inventions. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially

different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, Group I requires no disk control unit as required in group III.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for either Group II or Group III, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
